2008 STUDENT GOVERNMENT ELECTIONS VOTER'S GUIDE

The presidential candidates often take the spotlight during the annual SG Spring elections, sometimes eclipsing the 37 Senate seats up for grabs. But the senators still have influence and must make tough decisions about how to spend student money. Use the Kernel's voter guide to get acquainted with the candidates before casting your vote tomorrow or Thursday.

Budget cuts are at the top of everyone's minds right now. I understand the significance of and out-of-state students.

Any organization that did not receive funding from SG due to our lack of funds at the end of this semester will be first priority. The Violence Intervention and Prevention Center and smaller organizations that have no other monetary source are also funding priorities.

Strength: SG has funded more student organizations and events than in past years and has begun taking steps to help students focus on the serious issues affecting this campus Weakness: SG's biggest weak ness was running out of funds so early in the year.

I would listen to what issues are brought up by the students before I would sponsor a piece of legislation. It is all based on the students' needs.

Student organizations and programs that emphasize student safety, diversity, and student engagement in elections and government would be high on my list of priorities.

Strength: The great variety of good, hardworking individuals we have in SG currently and those who are running. Weakness: Institutional legitimacy. We need to work hard to convince the student body and the community that SG is here for a reason — to make the lives of students and our campus in general better.
